Korry

Illuminating. Always.

Korry Electronics

Reliable human-machine interfaces for Commercial Aviation

Korry's highly reliable range of human-machine interface (HMI) products can be found on almost every commercial aircraft past and present.

With over 80 years of experience designing and producing solutions for the cockpit, Korry has built a reputation as a world-leader in the field of illuminated HMI products.

Our extensive range of aerospace components are sold to customers world wide, either individually as components or included in our control panel products.

For modern cockpits, our latest generation AMLCD avionics displays provide the latest in HMI solutions and offer the flexibility and versatility of touchscreen controllers.

Reliable human-machine interfaces for Commercial Aviation

Components

Korry is the market leader for aerospace illuminated push button switches, annunciators and knobs. With millions of part numbers sold worldwide, Korry components can be found on most every commercial aircraft in-service today, providing superior lighting properties, making Korry the number one choice for both aircraft manufacturers and subsystem providers.

Avionics Displays

Korry's proprietary Active Matrix Liquid Crystal Displays (AMLCDs) and life-of-the-aircraft backlight technology all deliver a visual performance second to none, with superior color depth, contrast ratio, color stability and wide viewing angles in day and night operation. Using Korry proprietary process control mechanisms, optical quality is guaranteed over the complete operating temperature range and life time.

Control Products

Korry control products includes our line of Utility Control Systems, Control Panels and Integrated Switch Panels product lines.

Utility Control Systems

Our decades of optical expertise ensures all of our control product solutions have superior lighting uniformity and dimming control providing the pilot with the best day & night visual performance.

(above) Korry's world-first utility control system with integrated touchscreen controls for the Gulfstream G500/G600/G700 aircraft

(above) Korry provides the entire suite of Integrated Control Panels for the 787 flight deck with solutions featuring Korry components

Control Panels

Korry Control Panels (above) provide high-reliability control and display functions for communication, warning, advisory, flight, and engine systems.

Integrated Switch Panels

Korry Integrated Switch Panels (right) are available in a number of formats or can be developed to specific requirements.
